# Token Distribution

## Token Economics

Zoobit Token is a complete money market protocol running on the Binance Smart Chain (BSC). ZBT is the native BEP-20 token of the platform — which is mainly used For platform dividends and governance such as — product upgrades, bet return, Adjustments, platform parameters, etc. ZBT is issued through a fair start mechanism Supported by a well-funded team, and token issuance is open and transparent.

TokenName: ZBT

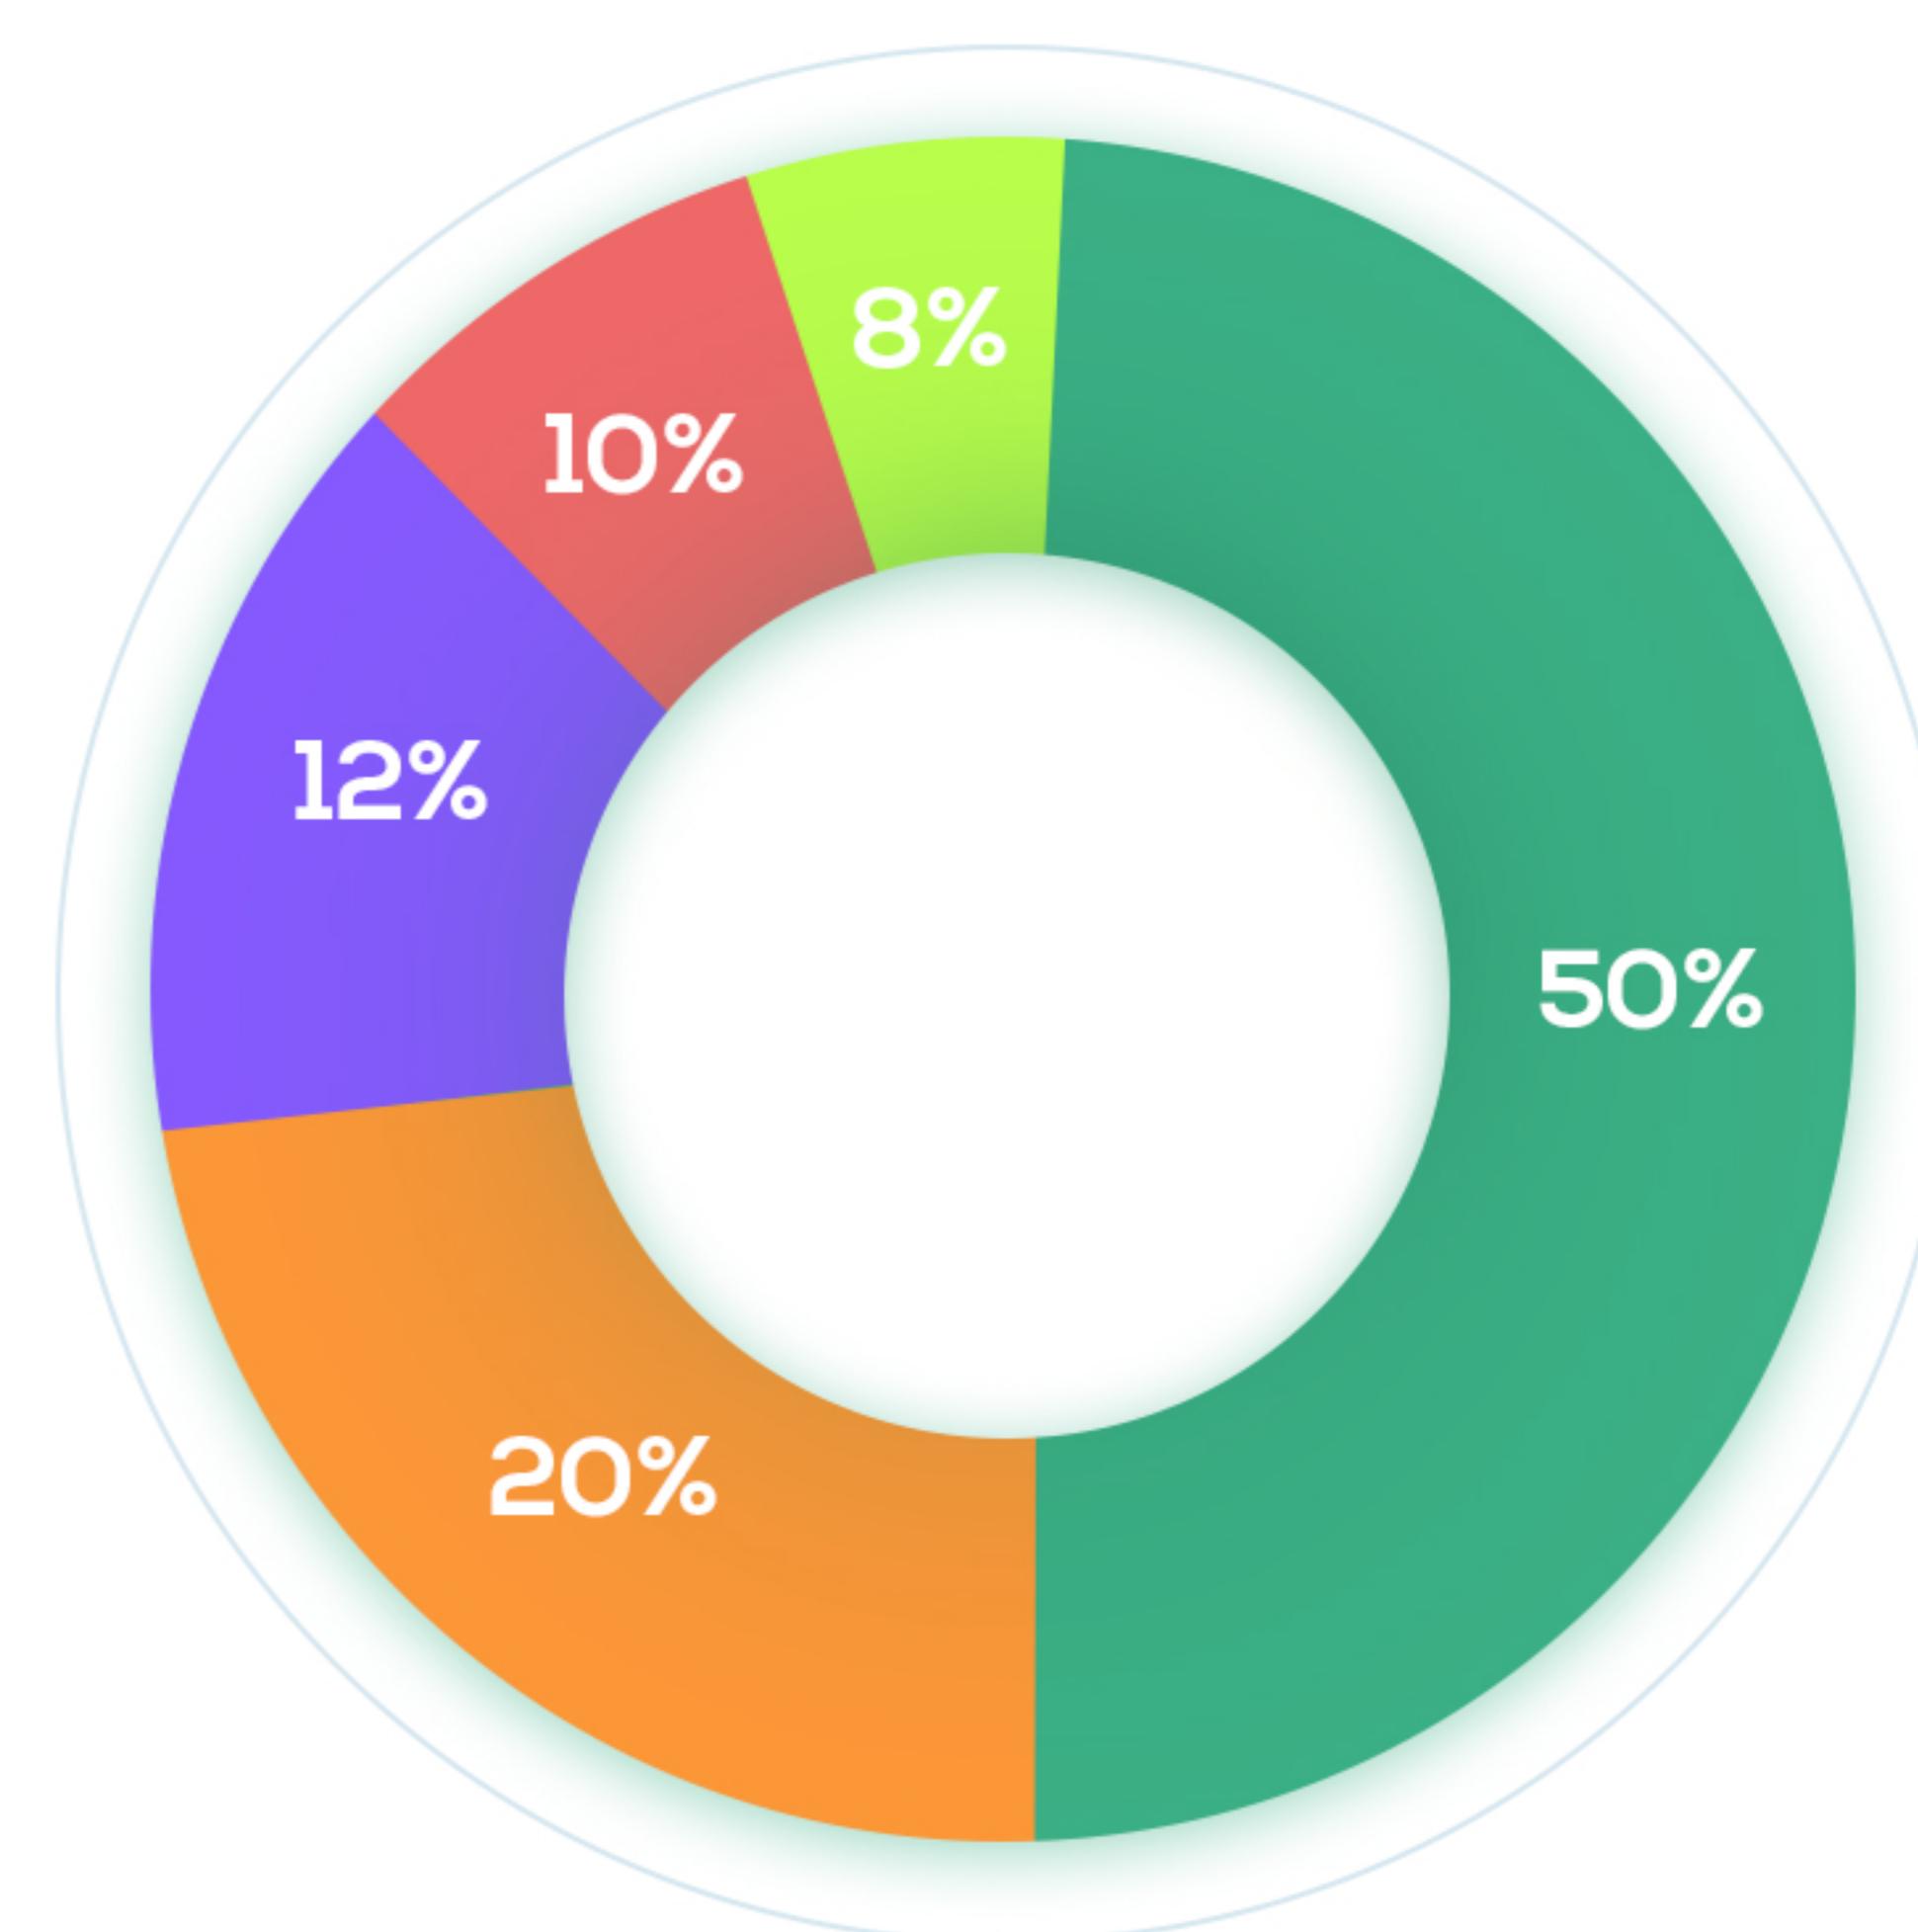

TokenName Type: BEP-20

TokenName Total Tokens: 200 million pieces

ZBT is designed to have 200 million and will never be issued. The distribution of ZBT consists of five parts: IDO sale, team, marketing, casino betting return and Activities. Private sale sold for 10 million, and public IDO was sold for 30 Million — accounting for 15% of the total. ZBT in IDO is gradually released when the Project is launched. The number of tokens of the team is 16 million, accounting For 8% of the total amount of tokens.

Zoobit.Finance team is a non-profit organization. Its ZBT tokens will help Zoobit.Finance complete its technical development and subsidize its operation and Maintenance costs. Zoobit.Finance Foundation can recruit personnel to complete the Above work in person, or entrust a third party to complete it. The official website Activity is 20 million, accounting for 10% of the total tokens; it is used for the Activity development of the official website, holidays, and membership day. The Number of marketing tokens is 4 million, accounting for 2% of the total amount of Tokens — to open up new users, attract and motivate to increase the activity of the Casino platform. Casino mining is 100 million, accounting for 50% of the total tokens Users come to the platform to pledge, game betting, deposit and withdrawal of Mining activities. Unlike DEX mining projects, each token we produce has value Binding.

# Project Benefits

## Decentralization can verify the value of the game platform

For blockchain users you hold BTC, ETH, and USDT. You cannot deposit them into casino for games like legal currency. The emergence of digital currency game platforms enables you to not only play games in your spare time, but also to bet, mine and earn. With this platform, you can repurchase more BTC, and you will also obtain income through platform mortgage tokens. The digital currency game platform breaks the shortcomings of traditional casinos and provides more options for the members' deposits while taking into account anonymity and privacy protection.

## Why Zoobit?

Completely decentralized. No registrations, no pre-recharge, and no application for withdrawal.

## Fair Use

Continuous network line without any interference. All games are randomly generated by block hash values, the results are unified, cannot be changed and can be publicly checked.

## Secure and Safe

Completely anonymous. No personal information is left, operating capital is visible, transfer records are visible, and false publicity is not allowed.
